Tender Evaluation

The number of vehicles mentioned in Table 1 above is for the purpose of calculation.

The successful bidder should be in a position to supply (up to 7-8) additional vehicles than the approximate daily requirement, during the period of peak demand, which will be notified in advance.

The package shall be calculated on a notional basis per day by multiplying rates quoted for **10 hours/80 km** with the number of vehicles for each category, and adding these to find the total rate considering all three categories, as given in the following table.

Class	Car category	Average Daily Number of Vehicles Required (N)	Rate / 10 hours/80 km (Per day per vehicle) (R)	Total (C = N*R) (for office use for cost calculation)
A	Premium Sedan	4	R1	$C1 = 4 * R1$
B	Sedan	5	R2	$C2 = 5 * R2$
C	SUV / MUV	7	R3	$C3 = 7 * R3$
Total				$TC = C1 + C2 + C3$

The tender shall be awarded to the bidder for whom the total rate (Total Cost or TC in above table) including all three car categories, as calculated above, comes out to be the minimum.

Payment will be based on actual usage (pro rata).
